T., W., and J. particularly solicit the attention of architects and builders to the fact that, by the use of this machinery, a very large saving both of time and money, in effecting a great, indeed, that in many cases they can deliver a well-finished article in Caen stone for less money than it can be obtained in cement, while their wood-carving will, in some cases, be found to come into close competition with the best kinds of composition ornament.—For prices and estimates apply at 134, Strand.

TESTIMONIAL FROM CHARLES BARRY, ESQ.

Westminster, May 16th, 1848.

"Gentlemen.—In reply to your letter requesting my opinion of your Patent Carving Machinery, I have much pleasure in stating, from an experience of more than two years in its application to the production of the wood carvings of the Houses of Peers, and other apartments of the New Palace, at Westminster, that I am enabled to make the most favourable report concerning it, and to add that it has more than justified the favourable terms in which I recommended it in 1845 to her Majesty's Commissioners of Woods and Works for adoption.—I remain, Gentlemen, yours faithfully,

"CHARLES BARRY."

"Messrs. Taylor, Williams, and Jordan."

**PAINTING WITHOUT SMELL.**—The deodorating or last sought after.—Mix your paint with the newly-discovered SWEET OIL of TURPENTINE, certified by Dr. Scrivy, instead of the deadly abominable called Oil or Spirits of Turpentine. The following certificate must convince the most sceptical:—

"This is to certify that I have analysed and subjected to various tests a Sweet Oil of Turpentine, which is wholly free from the smell hitherto considered inseparable from the article. The process of manufacture, which is entirely new, has been communicated to me by the inventor in confidence, and I am satisfied that by this discovery the deleterious properties for which oil of turpentine has hitherto been notorious are wholly obliterated, whilst its useful properties are preserved intact, and that the use of common oil of turpentine in all branches of trade wherein this article is now used will be entirely superseded. I find that paints, when mixed with Sweet Oil of Turpentine, although greatly improved in brilliancy of colour, is FREE FROM SMELL, and does not emit those noxious vapours which are so offensive to the smell and prejudicial to health, and I am confident that this discovery will prove to be a SURE PREVENTIVE AGAINST the common and fatal disease called by PAINTERS COLIC, and an invaluable boon to the public, in depriving the process of house painting of those manifold ill effects and discomforts with which it has hitherto been accompanied.
